What We Promise

- ▶ The tip of a 1 inch wide tape measure will be visible at 2 feet depth in a pond that is built using all required and properly sized OASE BIOsys components.
- ▶ If the tip of the tape is not visible, your OASE dealer or OASE will recommend changes to remedy the situation.
- ▶ The Clear Water Guarantee assumes that all OASE BIOsys components are in working conditions and that normal pond and equipment maintenance is performed.
- ▶ The Clear Water Guarantee also assumes that you maintain a plant and fish population appropriate for the size of pond and the specific OASE BIOsys products in use.
